Profile

AI/ML undergraduate proficient in Software Engineering, Machine Learning, Computer Vision, and RAG-based applications. Strong foundation in DSA, Python, and core CS concepts.

Education

Guru Jambheshwar University of Science and Technology	GPA: 8.12
B.Tech in Artificial Intelligence and Machine Learning	2023 – 2027
Holy Child Public School	Rewari, Haryana
12th CBSE	Percentage: 81.2% 2023
10th CBSE	Percentage: 93.2% 2021

Experience

Research Intern – Indian Institute of Technology Bhubaneswar	19th June – 26th July 2026
<i>Remote</i>	

- Worked on implementing **Vision-Language Model (VLM)**-based approaches for Person Attribute Recognition (PAR).
- Collected and prepared visual data and experimented with vision-based VLM techniques for person attribute recognition.

Projects

Project 1: Heart Disease Prediction Web Application

- Built a backend-driven healthcare prediction platform that analyzes 13+ clinical parameters to estimate heart disease risk using machine learning models.
- Tech Stack: Python, Flask, Scikit-learn, REST API.
- Achieved nearly 85% model accuracy on the UCI Heart Disease dataset and deployed real-time prediction endpoints for API integration.

Project 2: Smart RAG-Based AI Document Assistant

- Designed an intelligent document assistant capable of semantic search and context-aware question-answering using a Retrieval-Augmented Generation (RAG) pipeline.
- Tech Stack: Python, FastAPI, FAISS, Sentence Transformers, Ollama, NLP.
- Improved contextual response retrieval by approximately 85% and reduced manual document lookup time by over 70% through vector embeddings and an interactive chatbot interface.

Project 3: Hand Gesture Recognition System

- Created a computer vision-based gesture recognition application capable of detecting and interpreting hand movements in real-time environments.
- Tech Stack: Python, OpenCV, TensorFlow, Keras, Image Processing.
- Obtained around 90% classification accuracy, supporting touchless interaction use cases including gesture-controlled systems and sign language assistance.

Key Skills

- **Languages:** Python, C++, SQL
- **Tools & IDEs:** Git/GitHub, Canva, VS Code
- **Cloud:** AWS, Cloud Computing, Virtualization
- **Core Concepts:** DSA, OOP, DBMS, CN, Machine Learning, Neural Networks
- **Frameworks & Libraries:** Flask, FastAPI, Scikit-learn, OpenCV, FAISS, NumPy, Pandas, Matplotlib, Seaborn
- **Problem-Solving:** Solved **150+** DSA problems across LeetCode, GeeksforGeeks and Codeforces

Extra-Curricular Activities & Achievements

- Qualified the Profile Screening Round of **Flipkart GRiD 8.0**.
- Ranked among the top 5 teams at the university level in **Smart India Hackathon (SIH) 2024**.
- Served as the only **Female Student Coordinator** of Dean Students' Welfare, GJU&ST, contributing to the planning and execution of university-level technical and cultural events through effective coordination and leadership.
